Mining

Progress at Biely Vrch

Summary

EMED Mining is a copper-gold focused explorer and miner, targeting the historic mining centres of Europe and Eurasia, with projects in Cyprus and Spain, and a virgin gold discovery in Slovakia. It also has a 100% interest in the Rio Tinto copper project in Spain.

Key Metrics

Shares Outstanding (M): 424.9
 Current Price (GBP): £0.085
 Fully Diluted Shares (M): 493.2

Event

EMED has announced that the classification of the Biely Vrch Mineral Resources has been approved by the Slovakian State Commission for Classification of Mineral Resources.

Comment

The Slovakian State Commission is to grant a certificate giving Biely Vrch the status of an exclusive deposit. This should occur within the next thirty days, and gives priority to the land being used for mining activities over all other land uses. This is the first statutory step of the permitting process leading to the development of the Biely Vrch Gold Project.

AMC Consultants (UK) Ltd has completed an updated Scoping Study which takes into account community consultation and project refinements by EMED Mining. The Company and its environmental consultants are now able to proceed with preparing the Preliminary Environmental Impact Assessment. Aspects of the project which have been materially adjusted in the updated scoping study include a new site having been selected for ore leaching and the entire site layout has been designed in detail. The preferred site and its topography will reduce the impact on the community.

Enhanced environmental protection measures have been incorporated into the design, which added to the capital cost. The total initial capital cost estimate has increased from US\$45M to approximately US\$64M. However, this has been compensated for by a reduction in operating costs from an estimated \$590/oz to \$530/oz. Geotechnical drilling is currently underway and may lead to further operating cost improvements if the planned pit slopes can be steepened in part of the designed mine. A mine design with steepened slopes would be able to access additional high grade ore by deepening the planned pit, without a significant increase in waste material required to be mined.

Recommendation

We retain our Buy recommendation on the company with a target price of £0.62/share, or £0.46/share on a fully diluted basis. We have not changed the target price as with in the next week we will be carrying out a review of our commodity and currency assumptions, which we believe will have a more significant impact on the company due to the weakening of the Euro.
